

DON'T WAIT UNTIL IT'S TOO LATE.

Vaccination is the best way
to protect you, your family
and your community.

If you have not gotten your COVID-19 vaccine consider this:

- **The Delta version of the virus grew from less than 1% of cases in May to more than 80% in July.**

Delta spreads about twice as easily as past strains of the virus and its victims are mostly people who are unvaccinated.

- **Getting vaccinated prevents severe illness, hospitalization, and death.**

Getting vaccinated will help protect against Delta and future changes in the virus.

- **All of the COVID-19 vaccines are safe, effective, and free.**

Call 1-866-365-8110 or visit scdhec.gov/vaxfacts for information or help finding a vaccine provider near you.
